- Communication

PROFILE

A highly creative full stack web developer with a strong background in leadership, customer service, and exceptional organizational skills, transitioning from a successful retail career to pursue a passion for web development. Eager to contribute creative and technical skills to tech-forward companies transforming concepts into tangible prototypes and beyond.

PROJECTS

myFlix

myFlix is a movie wiki that provides users with access to information about different movies, directors, and genres. Users are able to sign up, update their personal information, and create a list of their favorite movies. For this project I created the myFlix API to extract movie data from its database hosted on MongoDB. As well as two websites, one made with React and the other, Angular.

Chat App

Chat App is a mobile app made with React Native and the Gifted Chat library. It is designed to allow users to simultaneously message, send photos, and their locations to one another. Users can also view chat logs even while offline, for their convenience.

EDUCATION

Full-Stack Web Development Program, CareerFoundry

Oct 2022 - Oct 2023

- 6+ month intense online program focusing on developing technical skills for web development (HTML, CSS, JS, React, and more).

- 500+ hours of hands-on training accompanied by the guidance of industry professionals as a mentor and tutor.

AAS in New Media Technology, LaGuardia Community College

Sept 2017 - June 2019

- A 2 year program with a focus on digital media technologies. Such as learning web development basics, graphic design with Photoshop and Illustrator, animation and video editing with After Effects, Premiere Pro, Animate, and Blender.
